

ONE SYSTEM, WORKING AS ONE

COLOR COMPRESSED BOARDS + FIXING + FRAMEWORK + INSTALLATION

A façade is never just a surface. It's a panel, a fixing, a framework and installation, all acting together – or not acting at all. MONOLITH is engineered so they always act together, delivered and installed as one system rather than assembled on site from separate parts.

Engineered system build-up

- MONOLITH BOARDS – Premium 12 mm façade boards
- CONCEALED FIXING – Clips, brackets and fasteners
- SECONDARY FRAMEWORK – Corrosion-resistant sub-frame
- VENTILATED CAVITY – Continuous drainage and ventilation zone
- BUILDING STRUCTURE – Primary wall / structural system

Result – One point of accountability, from material selection to a finished, warrantied façade.
